Can-end Discharge towards seamer

The MMF-4 has the following features;

- Completely stainless steel structure
- Storage table with double optoc ensuring controlled feeding of rolls
- Storage capacity of 50 rolls of 2.02 ends
- Unwrapping unit by means of static knife in conjunction with rollers.
- Paper bin collector
- Sentinel system, for detection and automatic removal of reversed ends
- Discharge end conveyor c/w gap-control unit for controlled feeding towards seamer
- Standard 5 mtr of can-end conveyors included
- Easy operating and cleaning
- Minimal effort required for maintenance
- 24-hour operation – 7 day a week.
- Maximum safety for operating staff

CSW guarantees a machine efficiency of minimal 99% according to OEE.

CSW Mini Multifeeder 4 - MMF-4

Technical data

Model	MMF-4
Seamer connection	Double end infeed or feeding two individual single infeed seamers.
Can-ends	Aluminium SOT/Steel
Can-ends per hour	max. 120,000
Can diameter	2.00 – 2.09
Roll length	800 -1,200 mm Fixed to one length
Roll capacity	Max. 4 rolls/ min. based on double discharge
Packing of rolls	Acc. to CSW Roll Specifications
Compressed air	6 bar (g)
Air connection	10 mm
Compressed air consumption	4.6 Nm³/h
E- Power connection	400V @ 50Hz: TN-S
Total connected power	4 kW
Peak power consumption	2 kW
Stand by	0,2 kW
Nett weight approx..	1,500 kg

Please note that submitted energy consumptions are for indication purposes only, equipment energy consumption depends on actual system configuration for your specific requirements.

Options and upgrade kits MMF-4

- Integrated lift unit for steel lids
- Dustcover for can-end transport system
- Driven storage table in various capacities
- Change over sets for different can-end diameters
- Quick change over time
- Integrated Manual End Feed system as bypass
