

Hygienic Design following EHEDG requirements

"Assurance of quality and safety is an essential need for the continued good reputation of food-stuffs. The correct hygienic design and maintenance of food production systems is considered as a prerequisite to fulfil these requirements."

In addition to our standard can end / lid handlings systems, CSW also has the possibility to deliver CSW hygienic equipment following EHEDG requirements, in close cooperation with our customers, starting with a mutual agreement with regards to:

1. Function design specifications
2. Detailed design specifications

All this with the focus on:

- Open design for easy access and cleanability
- Prevention of hidden pockets to prevent growth of micro-organism
- Material Specification / Material "roughness"
- Specific / dedicated surface treatment

Possible for CSW automated can end unwrapping systems and automated roll depalletizers.
